

Siyuan Cheng

IS 439

Exercise 2

a. Metadata

Ans:

Title: Django for Beginners: Build Websites with Python and Django

Author: William S. Vincent

ISBN: 1735467200

b. Coverage of Django

Ans: This book covers Django 4. I read the update announcement for this book, and the announcement shows that they are completely updated for Django 4.0. Also, I think the information for Django 4 also is the latest version.

c. Introductory Tutorial

Ans: I see the label on the book says they have an official tutorial. Therefore, I would say they have their introductory tutorial. Also, I read the comment, customers say they have an excellent Django tutorial.

d. Django Reference

Ans: I would say this book covers a lot of features about Django. I recommend this book because it is very useful for beginners, so you can share it with your student for next semester. I copy some features from their introduction, such as building 5 websites from scratch, and they also include a Blog and Newspaper, deploying online using security best practices, and they will write tests and run them for all code. Therefore, I would recommend this book as the next textbook for IS439.
